Live Polling

Live Polling are questions similar to surveys but conducted in *real-time*, where the poll creator can immediately see the responses from the poll participants as they answer.

It can be used to make seminars more interactive, and let the speaker receive immediate feedback from the audience.

Research

Research is essential for gaining information that allows you to make informed decisions, whether in your business, your work, or your daily life

Surveys

Surveys are a common and flexible research method to collect data on almost anything.

Surveys are often conducted online due to how cheap it is to create surveys and collect data.
